### REBUILDING BRAKE CYLINDERS

In rebuilding 1965-on Alfa brake cylinders, you must determine the manufacturer before ordering a kit. With ATE calipers, cylinders may be ATE, Bonaldi or Benditalia. They are used randomly by Alfa within a model series. All three may be installed on one car. Identify your cylinder, then order the appropriate ATE or Bonaldi/Benditalia kit. Our kits don't fit Brembo cylinders except as noted.

## BRAKE CYLINDER REPAIR KITS

Restore calipers and cylinders to original condition. Rebuild kits can cure leaking hydraulic cylinders, solve unequal braking problems and eliminate poor brake pad wear. Refer to Tech Tip on bottom left of this page.

Manufacturers used by Alfa Romeo—abbreviation key: **A**=ATE; **B**=Benditalia; **G**=Girling; **BR**=Brembo
