

# Upgrade your car's looks and handling with a set of wheels!

We carry only hub-centric wheels—the lug bolts alone don't have to ensure that the wheel runs true (beware of non-hub-centric wheels!). Except as noted, **lug nuts or bolts are included.**

**Panasport (A, B)** wheels from Japan, familiar to anyone who follows vintage racing, feature ultra-strong, light alloy construction with steel lug inserts. Style "A" is the classic "Minilite" style, with outer rims that are polished before clear coating. Style "B" is a more modern wheel that looks great on later Alfas.

**Cromodora (C)** has made replicas—in aluminum alloy—of its beloved Daytona-style CD-35 wheel. These look perfect on a GTV or Spider.

**Intra (D)** and **Exip (E, F)** wheels combine fresh styling and quality German manufacturing. A great way to run low-profile tires on your Spider.

**Alfa GTA (G) and TZ Replica Wheels (H)** are aluminum alloy copies of the original magnesium wheels that came on these lightweight race cars. We have them made in Britain, to a very high quality standard. They look great on earlier (pre-1975) Alfas, but will also fit later cars equipped with ATE brakes. A must for vintage racers!

## PLEASE NOTE:

There is a shipping surcharge of **\$9.00 per wheel.** Once tires are mounted on wheels, they are not returnable.

	Photo Key	Brand	Size	Wheel Offset	Rec. Tire Size	Item No.	Price Each
